

Solutions & Solubility Song

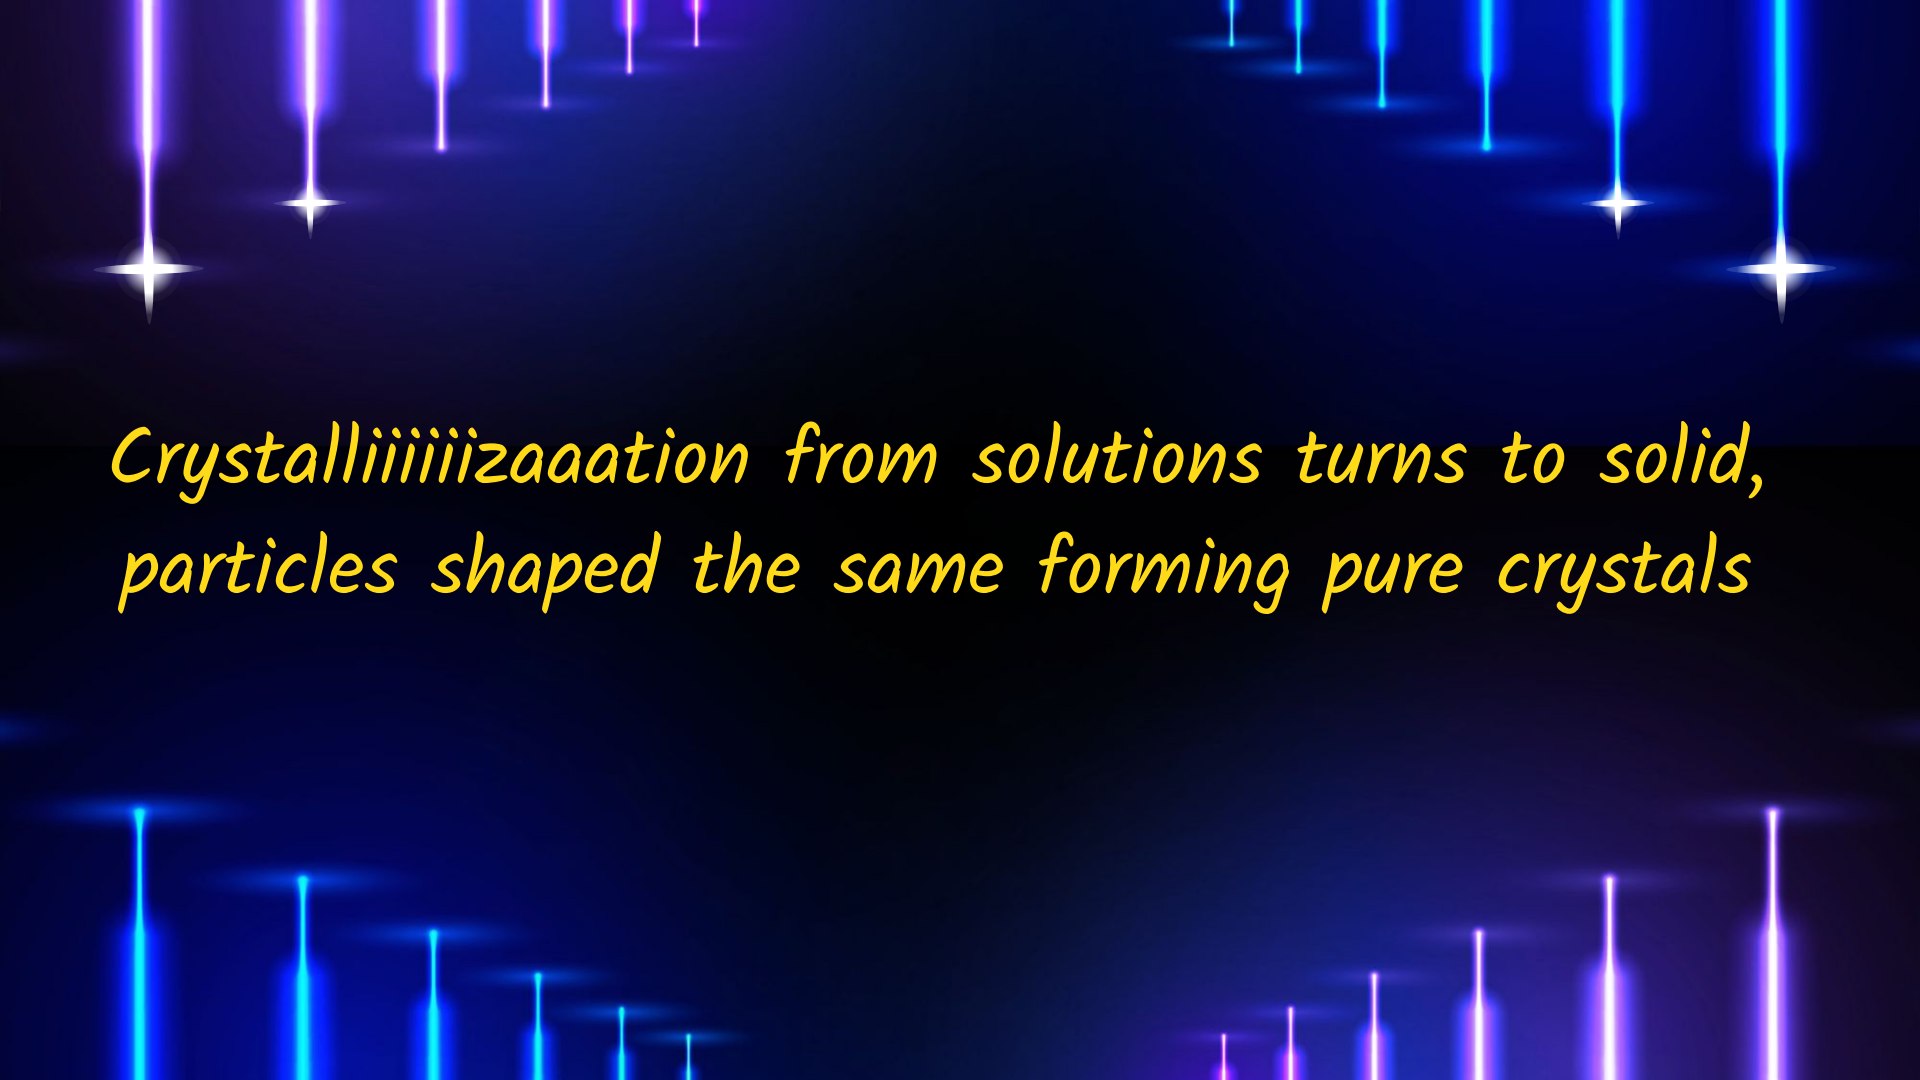

Mrs. Fraser and Miss. Sipos Production

*A solution is a type of mixture,
that is homo- gen-eous.*

*It means that it's the same
throughout, the same through-out.*

*Crystallization from solutions turns to solid,
particles shaped the same forming pure crystals*

*The major por-tion of the solu-tion,
the thing that does the dissolving.*

*It bears a special name for its job, it's called
the sol-vent.*

*The other part of the solu-tion,
the thing that gets dissolved.
It also bears a special name, it's the sol-ute.*

*Solu-tions are made up
of two or more substances.*

*Sol-u-bil-ity The ability to be dissolved.
Especially in water ... Together they're
beyond compare.*

Solu-tions the best mixed mix-ture!

*A solution is a type of mixture, that is
homo- gen- eous.*

Heterogeneous means insoluble mixture.

*It's a mixture of two or more
things that don't mix right!*

*With one you can see their parts,
and with one you cannot.*

*Solu-tions are made up
of two or more substances.*

*Sol-u-bil-ity The ability to be dissolved.
Especially in water ... Together they're
beyond compare.*

Solu-tions the best mixed mix-ture!

 AIR GUITAR 

*Solu-tions are made up
of two or more substances.*

*Sol-u-bil-ity The ability to be dissolved.
Especially in water ... Together they're
beyond compare.*

Solu-tions the best mixed mix-ture!

Don't stop dissolving!
